“ I remember my heater core going out on me one Sunday afternoon. I needed to get back to temple tx that night. I was already to Good Springs, when I realized my truck was running hot. I called Randy and he advised me that I could in fact bypass the heater core and drive the truck that way. He drove out to where I was with a couple of different size pieces of pipe. Unfortunately, all the pieces he brought were too big or too long. The only thing we had close to the size I needed was a small Maglight. He found a set of tubing cutters in his truck. We cut the Maglight, fitted the hoses to each end and filled the radiator up with water. Not only did Make it home, I drove the truck that way for a year after that. Randy was always full of useful knowledge. Whether it was from his own personal encounter or what he learned from someone else. I'll miss u Randy. Sincerely, Jacob F.
